Skills

- **Programming Languages** : JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
- **Frontend** : ReactJS, React Native, Redux Toolkit, Tailwind CSS, React Router, Jest
- **Backend** : Node.js, Express.js, RESTful APIs, GraphQL, JWT Authentication, OAuth 2.0
- **Databases** : MongoDB, PostgreSQL, Redis, Supabase, Firebase
- **Tools & Platforms** : Git, GitHub, CI/CD, AWS, Webpack, Vite, Postman, Vercel
- **Engineering Concepts** : MVC Architecture, API Integration, Authentication & Authorization, Data Structures & Algorithms, System Design, Performance Optimization, Responsive Design

Experience

DSA Instructor & Freelance Developer Feb 2026 - Present
Self-Employed

- Teach Data Structures & Algorithms, covering problem-solving patterns, time/space complexity analysis, and technical interview preparation.
- Develop full-stack applications using **React.js, Node.js, and Express.js**, implementing REST APIs and integrating frontend workflows with backend services.

Software Development Engineer Jun 2023 - Jan 2026
FlyyX Technologies

- Developed the **Flyy Gamification Platform Dashboard** using **React.js, TypeScript, and Redux Toolkit**, supporting **thousands of enterprise users worldwide**.
- Designed reusable component architecture and scalable application workflows, reducing recurring feature development time by approximately **30%**.
- Developed backend services using **Node.js and Express.js**, implementing **RESTful APIs, MongoDB schema design, CRUD operations, request validation, and centralized error handling** for campaign configuration and data-driven workflows.
- Implemented secure **JWT-based authentication and OAuth 2.0 integration**, supporting protected API access, authentication workflows, and authorization controls.
- Optimized application performance through **code splitting, lazy loading, memoization, and efficient database queries**; validated API integrations using **Postman** and collaborated across teams using Git/GitHub and Agile/Scrum practices.

Junior Software Engineer Oct 2022 - May 2023
AppyCodes

- Developed full-stack web applications for multiple US-based client projects using **Node.js and Express.js** for backend services and **React.js, JavaScript, and Tailwind CSS** for frontend development.
- Contributed to **REST API development and frontend-backend integration**, delivering end-to-end features while supporting code reviews, pair programming, and unit testing.

Projects

SnapUI: Modern React Component Platform
https://snap-ui-two.vercel.app/

- Built a reusable React component platform with customizable component APIs, responsive layouts, accessibility support, and dark mode theming. Deployed on Vercel with SPA routing configuration.

Achievements

- Achieved a **1600+ LeetCode Contest Rating (Top 24%)**, participating in **15+** weekly contests.
- Solved **500+ DSA problems** across **LeetCode, Codeforces, GeeksforGeeks, and takeUforward**, strengthening algorithmic problem-solving skills.
- Received **multiple client appreciations** for delivering high-quality solutions and meeting project requirements.

Education

Scaler 2027
Computer Science
Specialized in Software Development & Problem Solving
Coursework: Data Structures & Algorithms, Low-Level Design, High-Level Design

Siliguri Institute of Technology 2021
B.Tech
