SUMMARY

Frontend Engineer with **3+ years of experience** building high-performance, scalable web applications using ReactJS, TypeScript, and Redux Toolkit. Proven ability to architect production-grade platforms used by thousands of enterprise users worldwide. Proficient in Frontend System Design (LLD & HLD), component-driven architecture, and integrating AI/LLM-powered features into modern web products. Passionate about crafting seamless user experiences and writing clean, maintainable code.

EXPERIENCE

Software Development Engineer

FlyyX Technologies

June 2023 – Present

Bengaluru, Karnataka

- Architected and built the **Flyy Gamification Platform Dashboard** end-to-end as the sole frontend engineer using **ReactJS, TypeScript, and Redux Toolkit**, serving **thousands of enterprise users worldwide**.
- Designed scalable frontend architecture with a reusable component library, reducing feature development time by ~30% across recurring dashboard modules.
- Integrated **GraphQL APIs** and RESTful endpoints with optimized data-fetching strategies, enabling real-time campaign configuration with minimal latency.
- Applied performance optimization techniques — code splitting, lazy loading, and memoization — improving application load speed and core web vitals scores.
- Explored and integrated **Generative AI** features leveraging LLM APIs to enhance platform intelligence, including AI-assisted campaign configuration suggestions.
- Collaborated with product, design, and backend teams in an **Agile/Scrum** environment.

Junior Software Engineer

AppyCodes

October 2022 – May 2023

Siliguri, West Bengal

- Built responsive web applications using ReactJS, JavaScript, and Tailwind CSS for US-based client projects.
- Developed reusable component libraries, improving UI consistency and reducing redundant code by 40%.
- Maintained high code quality through code reviews and collaboration.

PROJECTS

SnapUI: Modern React Component Platform | *React.js, JavaScript, Tailwind CSS, React Router, Vite* | Live Demo

- Designed and developed a modern developer-focused UI component platform inspired by shadcn/ui and Vercel.
- Built reusable, copy-paste React components with responsive layouts, accessibility support, dark mode theming, and customizable APIs.
- Optimized user experience with responsive design, smooth route transitions, reusable layouts, and modern developer-tool UI patterns.
- Deployed the application on Vercel with SPA routing configuration and CI/CD integration through GitHub.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: ReactJS, Redux Toolkit, React Native, NodeJS, GraphQL, Tailwind CSS

Tools: Git, VS Code, Figma, Webpack, Postman, Vercel

Concepts: Data Structures & Algorithms, Frontend LLD & HLD, REST APIs, Component-Driven Architecture, Responsive Design, Generative AI / LLM Integration

CERTIFICATIONS

Meta Frontend Developer Professional Certificate

Meta (via Coursera)

Namaste Frontend System Design

NamasteDev — Akshay Saini

Namaste React

NamasteDev — Akshay Saini

Generative AI Certificate

Qualcomm

EDUCATION

Bachelor of Technology (B.Tech)

Siliguri Institute of Technology

August 2018 – July 2021

Siliguri, West Bengal

Diploma in Engineering

Kingston Educational Institute

September 2015 – June 2018

Kolkata, West Bengal
